Department: CSE - FE

Batch: 2028

Degree: B.E - CSE

## NeoColab\_REC\_CS23231\_DATA STRUCTURES

REC\_DS using C\_Week 6\_COD\_Question 2

Attempt : 2 Total Mark : 10 Marks Obtained : 10

Section 1: Coding

## 1. Problem Statement

Nandhini asked her students to arrange a set of numbers in ascending order. She asked the students to arrange the elements using insertion sort, which involves taking each element and placing it in its appropriate position within the sorted portion of the array.

Assist them in the task.

## **Input Format**

The first line of input consists of the value of n, representing the number of array elements.

The second line consists of n elements, separated by a space.

Output Format

The output prints the sorted array, separated by a space.

Refer to the sample output for formatting specifications.

```
Input: 5
    67 28 92 37 59
    Output: 28 37 59 67 92
    Answer
    #include <stdio.h>
You are using GCC
    void insertionSort(int arr[], int n) {
       //Type your code here
       int temp,j;
       for(int i=1;i<n;i++){
         temp=arr[i];
         j=i;
         while(j>0 && arr[j-1]>temp){
           arr[j]=arr[j-1];
           j=j-1;
         arr[j]=temp;
    void printArray(int arr[], int n) {
       for(int i=0;i< n;i++){
         printf("%d ",arr[i]);
       }
       printf("\n");
    int main() {
```

int n;

int arr[n];

scanf("%d", &n);

for (int i = 0; i < n; i++) (

Sample Test Case

240701519

insertionSort(a printArray(arr, return 0;	&arr[i]); arr, n);	240707519	240701519
Status: Correct		Marks : 10/10	
240101519	2,40701519	240101519	240701519
240101519	240707519	240707519	240101519
